

## **ITWebMaster - Website Content Management**

ITWebmaster is a complete website content management solution. It provides organizations that have little or no 'webskills' to easily develop and maintain a professional website.

### **Easy to use**

Using ITWebmaster, administrators with minimal computer experience can create fully formatted webpages (no HTML). The user-friendly interface is used to create menu items, new web pages, insert links, display graphics/photos, and post documents.

### **Volunteer Webmasters**

Organizations are often caught in the trap of waiting on the volunteer webmaster to make updates to their website. With ITWebmaster, administrators with any level of computer skills can maintain & update their own website, reducing the reliance on a single volunteer webmaster. It also enables the webmaster to pass on his or her duties to the next volunteer.

### **Multiple Administrators/Multiple Locations**

Because ITSportsNet is 100% Internet based, administrators can make updates from any computer with an Internet connection.

### **Customized Website**

ITSportsNet provides you with a completely customizable website that can be up and running in just a couple of days. That includes your own domain, graphics, and colors. If you need a little help in developing a professional set of graphics, ITSportsNet can create those for you as well – just ask us about our custom graphics package.

### **Fully Integrated**

ITSportsNet's other products (ITLeague Manager and Online registration) fully integrate with ITWebmaster. If you choose to start with ITWebmaster, you can add on additional products with no effort.

### **Support and Training**

As with all of ITSportsNet's products, support and training are included with our package. This guarantees that your organization will be able to maintain its website as volunteers join and leave from year to year.

### **Best Practice Information**

We've compiled information to help you build and maintain a great sports club website. Visit [www.itwebmaster-itsportsnet.com](http://www.itwebmaster-itsportsnet.com) to learn more.

#### **How to Purchase**
