The Renegades Development Program is based on age specific training programs that foster proper technical development and provide a better understanding of the game's overall tactics. The primary objective is to develop the foundation skills of soccer, dribbling, ball control, kicking, shooting and passing, that are considered critical to a player's success.

Our goal is to help each player develop his/her individual skills and integrate these skills as they relate to team play. We hope that a love for the game and enthusiasm for serious skill training carries over into producing talented, well skilled, lifetime soccer players that may choose to continue and graduate into the Renegades Soccer Club's older U12 to U 18 teams.
